Tropical Storm/Hurricane Preparations

In preparation of a storm surge and/or hurricane wind gusts, please do the following:

1. Call building elevators up to the 2nd or 3rd floor before the rain starts
2. Remove furniture, plants, etc. from all balconies and outside areas
3. Raise garage doors up at least 2 feet to allow water to flow out
4. Move valuables (power tools, tool chests, etc.) stored in your garage to a dry location
5. Move your vehicles out of the garage to higher ground if you are on the bay (south and west) side of Sunset Bay Villas
6. Secure your windows/glass doors with storm shutters if available
7. Have cash on-hand as banks and ATMS may shut down
8. Always carry your ID with your current address

In past hurricane events, the buildings closest to the bay on the south end of the complex (#12, 13, 16, 17, 18, 19, 20, 21, 22) experienced the most water in the garages.
